## Look For A Silver Lining

During periods of difficulty and discouragement it is natural that the minds of people turn to and dwell upon those conditions which are sources of their difficulties and the cause of their discouragement. In fact, the desire is for people to dwell upon these things to the almost entire exclusion of subjects which provide room for confidence and encouragement.

This, it may be repeated, is quite natural; just as natural, in fact, as it is during periods of rapid development and general prosperity to close one's eyes to all warning signs along the road. In other words, the vast majority of people are enthusiastic optimists, and are more inclined to dream and to hope than to confront the actualities of things as they are going well, but are just as confirmed pessimists and impatient with those who point to favorable signs, when the existing state of things is bad. Very few of us take note of the cloud small as a man's hand coming up on the horizon when the noonday sun is shining, and the number is equally small who can see the silver lining to the clouds when the skies are completely overcast.

As a result of this tendency, mankind plagues thoughtlessly ahead, the great majority sweeping all others long for good or ill. During boom periods, when the cry is full steam ahead, and when this, or the other great project involving the expenditure of millions of borrowed money is being advanced, persons who tend to advise that we should give more serious consideration to the project, the cost, and the like, are regarded as the cynical and incurable critics, and are often regarded as backwoodsmen. Compliments which at such times tell the people that there is a limit to this discounting of the future, that a pay-as-you-go policy is much wiser, are swept away. The speakers take control.

But when the bubble bursts, when prosperity vanishes and depression takes its place, when the free spending comes to an end, and the bills are paid, the same persons who were so bold in their predictions of success in heavier and heavier doses, those who were most outspoken in favor of heaving the bills and most contemptuous of those who urged cut and slash, are the first to complain of the shortsightedness of politicians and Governments upon whom they placed to lay responsibility for all their troubles. On the other hand, during the prosperous periods most people take full credit to themselves for their good fortune, and then, when increased prosperity, and the general improvement of their business and their community, and are inclined to give little or no credit to anyone else.

After all, these are common traits in our human make-up. It is well, however, to occasionally take a good, square look at ourselves, to weigh ourselves in the scales, to be absolutely honest in an impartial sizing-up of our condition, to consider our own past views and actions and their effect upon present day conditions. Furthermore, in this present period of depression, it is well to remember that we must not let our eyes be blinded through blue spectacles, and to take a look at the silver lining to the clouds.

Notwithstanding all our economic problems, Canada is free from some of the worse of those which afflict the people of other nations. For example, what community in the whole length and breadth of Canada has been cracked and shattered by a lynching in its midst, and yet, in less than a single year, has not been fully healed? How many kidnappings have occurred in Canada even during these times which unquestionably are an incentive to law-breaking and violence, although kidnappings are still happening across the line?

And why is it such a marked difference for the better prevails on this side of an imaginary line?

The answer is to be found in Canada's far greater judicial system. The law has been well administered, and when it is administered, it is remarkable how the invoking of lynch law unnecessary and, on the one hand, and proving a deterrent to kidnappers, murderers, and gangster activities. The tradition of respect for law and order in Canada is a great national asset, bringing comfort and security to all our people, and providing a sure guarantee against mob law and gangster rule in this Dominion. It is a strong foundation upon which Canada rests and will build throughout the years.

Much of the silver lining is seen in the absence of strikes and riots and picketings in this Dominion as compared with many other lands. There has been an occasional small strike in Canada, one or two small clashes with the officers of the law, an isolated case or two of picketing, but there have been no killings and, generally speaking, peace and order have prevailed throughout the period of the depression. Can we say that the same thing has occurred in Canada even during these times which unquestionably are an incentive to law-breaking and violence, although kidnappings are still happening across the line?

In this country, Canada presents a picture that is most gratifying when placed in contrast to most countries.

In Canada, too, our postal system and telephone service have stood the test. Records have been placed in safe hands in which lives have been lost, property destroyed, liberties taken away, disabilities established. In fact, all our people have been moving forward through the orderly processes of democratic, representative government. There has been no revolution, nor will there be. Confidence has been maintained in our existing form of government, and it is proving flexible enough to the people's will to enable them to meet the emergency.

Many other examples might be cited, and well occur to readers of this article, but those mentioned are given as an incentive to people to try and overcome their natural tendency to look constantly on the dark side of things in these days, and for a change contemplate and study those that are not only brighter but contain promise of still brighter, better things ahead.

According to the Dairy Industry, the Food and Drugs Act of Canada, "dairy" means a place where milk requires that butter should not be made from milk or cream of less than 50% contain more than 13.5 per cent cows is manufactured into butter.

Second-hand American machines tools are being sold in France. The South Indian air service is to be extended to Colombo, Ceylon.

## Household Drudgery The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman live in a house where she is compelled to do all the household drudgery without any relaxation. It is any wonder she becomes nervous and irritable, has hot flashes, and suffers from sleeplessness, headaches, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's H. & S. Pills a remedy to strengthen the system and bring back the much desired healthfulness.

## Woman Botanist Has Made Hazardous Trip

### Tale Of Heroic Journey Brought Down From Alaska

From out of the fastnesses of Canada's north, now comes the tale of a woman's hazardous journey along 350 miles of the most dangerous part of the Arctic coast. Miss Isabel W. Hutchinson, young scientist, has completed the journey bearing hardship, hunger, extreme cold, and arriving at her destination, Akiaivik, just before Christmas. Word of her exploit was brought to Fort McMurray by Pilot John Bythell, Canadian Airways, returned from several months in the far north.

The Scottswoman made the trip by dog team, Pilot Bythell said, when winter overtook her as she was making her way to Eskimo schools around from Point Barrow. When she started, she had to walk 10 miles to get to the dogs.

It had been Miss Hutchinson's intention to make connections with the Arctic boat, Patterson, near Point Barrow, but Captain Peterson was unable to get to her in time because of the ice. However, she had chartered Eskimo schooners along the route to help her on her way.

Incidentally, about this time Miss Hutchinson had to leave the dogs, visiting and bringing several news items from the desultory Hudson Bay Company's boat, Baychimo, which was then still about 15 miles offshore.

Lots went after a succession of weeks, she was finally freed from the dogs with severe hardship and difficulty she covered with her dogteam dog teams, arriving at Akiaivik a few days before Christmas.

Although the weather was little worse for this tremendous journey, which if only on account of the excessive cold this winter, would have daunted the most hardened of northern travellers.

Miss Hutchinson collected rare bird and plant specimens for the Royal Gardens at Kew, England, and for the same purpose spent many months in Greenland a year ago. She is slight in build, Miss Hutchinson's physical appearance certainly belies the slender frame and dogged determination which enabled her company one who could go with the hardy Eskimos in his own terrain.

## Empire Mail Service

### Studying Routes Between United Kingdom and Canada

The aeronautical correspondent of the London Morning Post declares a cabinet committee was considering a step to launch an intensive period of Empire air communication expansion.

Already it was stated that it was studying the route between the United Kingdom and Canada and the United Kingdom and Australia.

The expansion, the correspondent said, would include faster air mail services and a modified subsidy system.

The committee sought, he added, to develop an airmail service comparable with that in the United States.

## OFF COLOUR? HOW IS YOUR LIVER?

### Wake up your Liver Bile —Without Calamine

You're here a very small organ, but it certainly does a lot of work. It's the liver that gets out of kilter by refusing to pour out the bile that's needed to digest food.

You won't completely correct such a condition by taking a diet of mineral water and lemon juice, though you'll feel better through and you'll sleep better.

Carter's Little Liver Pills will soon bring back your appetite and restore your health.

Take Carter's Little Liver Pills by tablet, 200 at a time, three times a day.

## A Robot Conveyor

### London School of Economics Has Installed Remarkable Machine

A remarkable robot conveyor, which can send 1,200 books in an hour to 240 different places, has been installed in a library at the London School of Economics, it was announced yesterday. Said Mr. Headlam, the librarian, "A book conveyor which is a veritable robot, will fill an application form, and by pressing a button there is automatically delivered a book to any room or desk you desire in any room or department from any department. All departments of the library are served by this machine. It is the only one of its kind in the world."

St. Bernard monks who are to establish a hospice in the Alba, between Switzerland and Thibet, are teaching the natives how to ask a new sport in that part of the world.

## Suck That

### Cough or Cold With Buckley's

It costs only a few cents to buy Buckley's Mixture, a few doses are needed to subdue the cough, and three times its volume of water making it tasteless.

Will not upset your stomach. Just save, save, because you can caught, cold, flu or grippe. Play your part in helping Buckley's. Buckley's is sold everywhere.

## A Second Houdini

### English Vicar Skilled In Freezing Himself From Mantles

The Vicar of Earls Barton, Northamptonshire, England, Mr. A. E. Ewart, is something of a second Houdini and, if he had not adopted the church as a career, might have won fame by his remarkable skill in escaping from iron-girded or handcuffs in the presence of friends and acquaintances.

At a British Legion dinner at the neighboring village of Irchester he astonished the company by a masterly display of handcuff manipulation. His hands were manacled behind his back, but in a few minutes the vicar was free, both locks having been opened.

Mr. Ewart has been known to escape from 25 locks in 10 minutes. He has freed himself from American leg-irons, German fetters, and German handcuffs.

On one occasion a police inspector (off duty) at a gathering, fastened a pair of handcuffs on Mr. Ewart, but had no key to release the vicar if he failed to escape. In a few moments the vicar was free. When he had induced the police officer to have his hands cut off. Smilingly, however, he decided to show his method of escape and the inspector had to return to the police station to get the handcuffs removed.

## White Collar Women

### Most Unemployed Office Girls Willing To Do Any Work

The white collar women are giving the world a new idea of what a woman is worth. There are 14,000 of them girls out of work and the civic authorities are at their ends to know what to do about it. The white collar girls are the aeronauts, bookkeepers, typists, nurses, secretaries, waitresses, for doctors and dentists, comptometers, and other office machine operators, saleswomen, bank girls, and others.

They call them white collar girls because they are the equals of the men in offices and stores. With 14,000 trained women and girls seeking work and finding none, Los Angeles is faced with a serious quandary.

What is the question unique in California? Every city in Canada has the same problem to solve. Women's white collar girls are anxious to work, but some of them cannot find any jobs. In fact some of them are only too pleased to work for anything at all.

## Conditions Are Improving

### Evidence Of Upturn In Business Shown By Increase In Sales Of Soaps

An indication that conditions are improving and that business is on the upturn is shown by the fact that the Salada Tea Co. sold over 54% more tea in Western Canada in 1933 than in 1932.

This is especially significant since Salada is a tea company.

**Feeding Methods For Turkeys**

Sanitation should be practical in all feeding methods with turkeys. Never allow the ground to touch their feet or the ground to touch the floor. You must clean the floor daily with water and never let the turkeys stand on the floor.

All feeding utensils should be kept perfectly clean. It is also important that these feeding utensils be moved regularly from place to place.

Trinidad's deep-water harbor project is to be started at once.

American industrial machinery is increasing in popularity in India.

## Stay fit

### Keep Fit With Vicks Vapo-Rub

### Sparkling Freshness

### ANDREWS LIVER SALT

### To maintain nature's rhythm

For sweating athletes. Lining down, etc. 40, 25 foot rolls or colored rolls. All colors or white.

Ciplapad PAPER PRODUCTS

HAMILTON, ONTARIO

## Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

### NO. 7—PRESBYOPIA OR "OLD-AGE SIGHT"

Although forty years of age is considered the normal age for presbyopia to manifest itself at about that age, it is common to find it earlier.

How often we hear people say "my sight is just as good as it ever was" even though they are 60 or 70 years old.

This condition is common to most people.

We consider the cause of this natural development, which causes so much inconvenience, after middle age.

We have fully explained that in order to have a clear range of vision, the eye must be able to change the length of the eyeball and the curvature of the cornea and lens must be properly related. The eye must be capable of changing its length and curvature respectively but fortunately the lens is elastic and "accommodation" which enables us to focus objects near at hand. Accordingly, as we grow older, the eye loses its power to accommodate and when it is about twelve to twenty years of age the eye begins to lose its elasticity.

For instance close work a certain amount is absolutely necessary to maintain the eye in health and the average person of forty-five does not need to wear glasses easily of assisting the failing accommodation by artificial means. As the accommodation continues to decrease, the strength of the lenses must be increased. This change should be every two or three years.

## Ruling Is Strict

### Producers Require Permit To Pack Grade A1 Eggs

Grade A1 of Canadian eggs is a super-grade and the packing of this grade may be done only by producers authorized by permit by the Dominion Egg Council.

Application by producer detailing to pack this grade should be made to the Poultry Services, Dominion Live Stock Branch, Ottawa. Grade A1, it is explained, was included in the recent revisions to the Canadian Standard for eggs, and two reasons first, to provide a place for eggs which, because of production conditions and speed of marketing, merit some recognition over the top commercial fresh egg grade, and second, to encourage the use of the best quality eggs.

Producers who would like to pack eggs which are not a product intended for international trading or long distance shipping should serve as an ideal source for which producers would be encouraged to work. Grade A1 eggs are not a product intended for inter-

national trading or long distance shipping, and are produced only under careful production conditions and are marketed without delay.

## Had Adventurous Life

### Capt. Carey, Former Commodore Of C.F.C.P. Fleet, Crossed Atlantic 600 Times

He was received at Montreal of the death at Walsay, England, of Captain Francis Carey, 85, former commodore of the Canadian Pacific fleet, who retired in 1914.

Captain Carey had an adventurous life. He was born in 1850 and crossed the Atlantic 600 times, once towed a large passenger boat 800 miles in December seas, transported a whole whale, and was the first commander of the ill-fated Empress of Ireland.

The aged captain once successfully commanded all the "lucky" boats on the Beaver line and was also with the Elder Dempster line before becoming captain of the Empress of Ireland in 1906.

## Fifth Exporting Nation

### Canada Held This Position During First 10 Months Of 1933

Canada held her position as the fifth largest exporting nation during the first 10 months of 1933, but the United States replaced Germany as the fourth on the list, according to figures compiled by the Dominion Bureau of Statistics from League of Nations sources.

The United States continued to hold first place by a narrow margin over Canada, while the United Kingdom and Australia occupied third place.

Canada's total exports of gold, silver and base metals were \$1,000,000,000.

Exports of coal were \$1,000,000,000.

Exports of iron and steel were \$1,000,000,000.

Exports of machinery were \$1,000,000,000.

Exports of chemicals were \$1,000,000,000.

Exports of foodstuffs were \$1,000,000,000.

Exports of clothing were \$1,000,000,000.

Exports of leather goods were \$1,000,000,000.

Exports of paper products were \$1,000,000,000.

Exports of rubber products were \$1,000,000,000.

Exports of machinery were \$1,000,000,000.

Exports of chemicals were \$1,000,000,000.

Exports of foodstuffs were \$1,000,000,000.

Exports of leather goods were \$1,000,000,000.

Exports of paper products were \$1,000,000,000.

Exports of rubber products were \$1,000,000,000.

Exports of machinery were \$1,000,000,000.

Exports of chemicals were \$1,000,000,000.

Exports of foodstuffs were \$1,000,000,00

## Three Gold Mine Shafts In Ontario Workings Descend To A Depth Of Over A Mile

It was only a few years ago that a depth of 1,000 feet in Canadian gold mining was considered a wonderful accomplishment; but today there are in Ontario three mines with shafts down over 5,000 feet from surface, or over a mile in depth, hundreds of miles of underground tunnels and no evidence of when there is a greater depth to which mining can be carried in the primary Pre-Cambrian rocks.

Engineering feats in Ontario to permit of such depths at the present time are not developments anywhere in the world and mere words fail to adequately describe the extent of the undertakings. For the layman it is hard to visualize a depth of two miles, over 11,000 feet, or the object to be attained in the mind of the miners less than one mile. The comparisons above, particularly with the Bank of Commerce building, should prove more realistic than abstracts.

It is the belief of eminent Canadian geologists and engineers that gold mining in Ontario will continue to become the deepest in the world. At least heads of two of the largest producing companies have already signified their intention of carrying work down at least 10,000 feet, making the present leader, that is, one goes to that depth.

The deepest gold mine in the world today is the Village Deep, in South Africa, which at last reports down over 7,600 feet. The greatest depth in the Americas is at St. John Del Rey mine in Brazil. This property which has been in operation for over 100 years has a shaft down about 7,600 feet.

The depth to which operations can be carried in Canada appears to be limited only by cost and hours by "white-man working temperatures." Underground rock temperatures in Canada are about an average of 20 degrees lower than those of the Rand, and about 10 degrees lower than mining. Further there is no danger from crumbling walls and roofs and it is claimed that the best tunnels are those at the lowest levels in mines throughout the Dominion.

Kirkland Lake stands as the birthplace of the deepest workings in the Dominion. The shaft is now down below 5,500 feet and ore was recently cut at a depth of 5,500 feet. With the present operating equipment operations can be carried to a depth of 5,500 feet. In the same vein the shafts carrying at the Teck-Hughes property is down to the 45th level, a depth of 5,480 feet and the No. 3 mine has reached the 42nd level. These shafts will be carried down to a depth of 5,750 feet, which will be the 55th level. The Lake Shore shafts are down 4,500 and 3,950 feet respectively, the Wright-Hargreaves shafts approximately 4,000 feet and the Sylvanite No. 2 shaft is down 3,600 feet.

In Port Hope camp the new winter started about a year ago at the McTyrne, some 3,000 feet from the No. 11 shaft, which is bottomed at 4,000 feet, is expected to reach a depth of 5,375 feet early in the new year and has already passed 5,000 feet. The deepest deep workings at the Hollinger are at 4,000 feet but further sinking is to be carried out at once. The main shaft at Dome Mines is down 3,200 feet. Considerations at a depth of 2,500 feet is an objective of the Act and Vizcaya workers comparatively shallow compared with the rest and stand at 1,450 feet. From Gold, Magazine of the North.

### Help For Blind Man

Michigan's eighties swimmer who competed in the Canadian National exhibition marathon swim yearly since its inception in an effort to obtain money for an operation on his eyes, is smiling. A Cleveland manufacturer is interested in his courageous battle for sight and is considering handing over the \$5,000 required.

He was testifed at a trial in Thames police court, London, in which a couple had falsely reported that their car had been stolen, that an "all-sufficient" message sent by the police had cost \$100.

"Are you going to take this lying down?" shouted the politician.

"No, the shorthand reporter is doing that," cried a voice.

### O'd Subscribers

**Names On Montreal Telephone Directory For 85 Years**

At least six of the names that appeared in the Montreal phone book 85 years ago are still to be found in the directory of today, according to a man who checked up on the old telephone. Misses Central knew all her subscribers by name in those days and nobody bothered about numbers.

In the early books of subscribers were many names of Sir Hugh Allan, Sir Hugh is dead but that name telephone is still "Havenstreet." A few others listed then as now were John Dougal, Hugh Paton and Fred W. Evans. There was also the firm of Crathern and Cawrill and today George Cawrill still has a telephone.

The little book showed that John McArthur had this convenience when he headed the firm of John McArthur and Son. Today the phone is still known by the name of McArthur, Lewis, Ed., but the McArthur's have had uninterrupted service for more than 50 years.

By September 18, 1883, there were 1,000 subscribers in Montreal and today there are 165,000, according to the latest count.

By Ruth Rogers

SHOULDERS COME IN FOR CONSIDERABLE ATTENTION THIS SEASON

If you are looking for a youthful smart dress, here's your number.

It has the up-to-the-minute shoulder-line. And note the pointed slimming shoulders.

Blue crepe satin made the original model.

There is also a little scarf collar, a delicate affair worn as shown in miniature view. It gives this model just that hint of out-doorness that you like to add to coats.

It is made with long sleeves and fashioned of wool crepe now so modish.

Style No. 538 is designed for sizes 12, 14, 16, 18, 20 years, 30 and 38 yards. Bust size 10 requires 3½ yards.

Price of pattern 20 cents in stamps or coin (check is preferred).

Wrap or coat.

### How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg.

### CANADIAN SPEED STAR FOR NORWAY

Alex Hurd, famous Canadian speed skater, who finished second in the 1,500 metres, and third in the 500 metres race at the 1932 Olympic Winter Sports, has left for Oslo, Norway, to compete in several international events.

### Production Of Grain

**Must Always Be Main Activity Of Lands West Of Canada**

Restrictive measures on grain production should not apply where no alternative crop can be successfully grown.

University of Saskatchewan, argues in an address on "Alternatives to Grain Growing in the Prairie Province," delivered at the agricultural societies' convention at Saskatoon, that the best way to combat the tendency to dual-purpose casting is to provide channels of marketing grain through livestock best adapted to Saskatchewan conditions.

Production of grain, he said, must continue to be the main activity on lands west of the Rockies.

Turning to the possibility of marketing cereals products, he pointed out part of the area where the best wheat was grown was unsuitable due to lack of water and restricted rainfall.

F. Warren, Boebeck; F. Marshall, Yellow Grass, and others, urged investigation of a general belief among farmers that many recent deaths of horses and cattle were due to eating the straw damaged by grasshoppers.

### A Timely Warning

**Better Health Progress And Medical Pictures Are Needed**

Zito's Theatrical News says the motion pictures had better watch out, for advance photographs bordering on the threshold of immorality may stop murders—rackets—thugs—an underworld connected with the underworld should be ledent to stop destroying the brain of the younger generation.

Hado needs a lot of attention. They must prepare, and prepare quickly, for now is the time for the place of the present hideous which can soon wear out. As it stands today the old timers are the hits and if I weren't for them where would radio be for stars on programs? I think at the age of nineteen hundred and twenty we are going to see a great change both in talent and radio, also in pictures.

### First Canadian Farmer

**Monument To His Memory Stand In Quebec City**

The district around Quebec on both sides of the St. Lawrence river is one of the oldest settled parts of Canada. There is in Quebec city a monument to Louis Hébert, the first Canadian farmer. This monument stands in City Hall park, said to be once a part of his farm. The direct descendants of many of the original settlers are still here, and the son of Louis still occupy the acreage across today. The effect of dividing the farm amongst the sons of the family is seen in the long narrow farm holdings, each fronting on the road. A system of roads has been constructed from the days when the farm was a practical unit, supplying not only food and shelter, but clothing, tools and other essentials.—Brandon Sun.

**Pilgrimage To Mecca**

**South African Doctor Does Not Wish To Leave Any Debts Behind**

An advertisement in a Cape Town, South Africa, paper says:

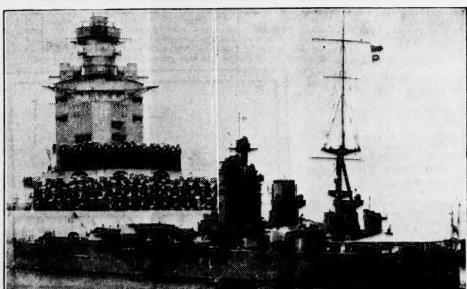

"Hadji Abdurrahman Bedford, of Cape Town, wishes herewith to inform his friends that this his son is leaving South Africa to go on a pilgrimage to Mecca, accompanied by his wife, Mrs. C. Bedford. It must be added that the Hadji was born in Cape Town on the 2nd February, 1873, and made his first pilgrimage to Mecca in 1900.

"It must also be recorded that the Hadji is leaving for the eighth time to Mecca with as clean a record as he left in 1892 and all other times, and in that direction. If there are any good will persons who would like to make claim in claim for debt against the Hadji, some person or persons are requested to come forward and present same before his departure."

"Is your commercial school for girls a great success?"

"Yes—60 per cent of the pupils have married their employers."

### JACK TARS TRIP THE LIGHT FANTASTIC TO MAKE THE NELSON "SHIMMY"

The ten hundred sailors who man the H.M.S. Nelson pride of the British Navy, had a joyful time when the 33,000-ton warship stuck fast in the mud after leaving Portsmouth recently. The whole crew assembled on the after-deck of the \$38,000,000 vessel and danced in unison in the hope that concerted action might "shimmy" the Nelson off the mud but without success. Admiral Sir William Boyle tried the old adage of having a square of destroyers run alongside with full steam to move her but to no avail. The crew of the Nelson had to be entertained by divers before leaving to lead more than a score of war ships on a cruise to the West Indies. Our picture (below) gives a good idea of the size of the Nelson. While (right) twenty-five members of the crew stand side by side to show how puny they are in comparison with the tower which towers in the background.

## During The Past Forty Years Canada's Relative Increase In Population Greater Than U.S.

### Corn Not Invaluable

**Other Grains Just As Good For Poultry Feeding**

There is no one grain that is indispensable in the feeding of poultry, though generally speaking, a ration in which there is a variety of grains will prove more valuable.

Canada has more grain-growing country and even in years of crop shortage there is available for feeding a surplus of wheat of the lower grades, consequently the grain that should form the basis of poultry rations is wheat, and to this should be added corn, barley, or whatever other grain are available.

There is in Canada a belief that corn is essential in feeding poultry. Corn unquestionably is an excellent feed and in the case of hens, when fed in the manner recommended as the basis of poultry rations. In Canada, however, corn is comparatively little grown and in some districts it is very difficult to procure and often at a price not justified when compared with other grains.

The Canadian government has conducted experiments with various grains containing no corn, and it has been demonstrated by feeding trials on the Experimental Farm that as good results can be obtained with rations containing no corn as with rations in which corn is used.

The Canadian government has conducted experiments with various grains, including barley, but as barley compares with corn in deficiency in vitamins, it is necessary to overcome this deficiency. This is best done by the use of alfalfa or cracked grain, or by combining corn with alfalfa, leaf meal or the leaves and blossoms of well cured hay. During the season of close confinement barley ratios may be further fortified by the use of cod liver oil.

For hens use home grown grain when it is necessary to purchase grains. When it is necessary to purchase grains buy those of which Canada has a surplus as they will give as good results at lower cost than imported feeds.—F. C. Elford, Dominion Poultry Husbandman.

### People In Glass Houses

**Christian World Cannot Criticize Buddhists For Being Divided**

Dr. Richard Roberts, writing in The New Outlook, says: "The religion of Japan is not the only Buddhist religion in the world. There is another, equally important, and probably the most powerful, Buddhist religion in China.

"It must also be recorded that the Hadji is leaving for the eighth time to Mecca with as clean a record as he left in 1892 and all other times, and in that direction. If there are any good will persons who would like to make claim in claim for debt against the Hadji, some person or persons are requested to come forward and present same before his departure."

"Is your commercial school for girls a great success?"

"Yes—60 per cent of the pupils have married their employers."

### Pink Grass On Range Land

**Freelash Happening By Bow River Sheepmen**

Montreal thinks that its "brownish-colored" snow but a story of "pinkish-colored" snow gives the grass green where sheep graze in the Bow river district was brought to Medicine Hat by herders who have been out since fall.

Following a heavy snow early in the fall last recent, there was a pinkish tinge to the grass when the range lands white plants disappeared. When touched, the grass crumbled in the hand.

Veteran sheepmen remember a similar occurrence in Montana many years ago. Scientists say that what brought it to the snow was passing through volcanic atmosphere in Alaska.

In December, Montreal had a fall of volcanic ash intermingled with snow. It gave the snow a brownish color.

### Work On Peace Gardens

A state transient civilian camp, under the Civil Works Association, will be established on the site of the International Peace gardens at Turtle mountain next spring. It was decided at the first annual meeting of the board of directors of the Peace Gardens' association, held in Brandon. Employment will be given to 300 men under federal instructions.

### Information For Teachers

"Gems" from the examination papers of Hastings, Nebraska, school children are keeping school teachers smiling. One boy, for example, learned that George Washington was the first President of the United States. That a grouch is a gruff old man and that in preparing literature for the table one should wash off the worms and other livestock.

Scotsman paid \$20 a head to accompany musicians in the last year.

## WORLD HAPPENINGS BRIEFLY TOLD

The tendency to glorify war in the school text books was denounced by Dr. Terence W. L. McDermott, secretary of the League of Nations Society of Canada.

"Sunshine Inn," free dining room in Victoria, B.C., celebrated its second birthday on January 4 with a record of 200,000 meals served to the needy.

The "Life of Our Lord," which had been written for his chil-dren by the painter after all. An offer of \$50,000 was reported to have been made for the book.

Claimed to be the fastest war vessel afloat, a new type of torpedo craft, capable of a speed of 55 knots, is under trial at Naziët-Nazie, France.

Canadian cotton-cloth growers have gone on record as favoring a national marketing board, it has been announced by J. A. Grant, provincial commissioner.

Churchill's first public "stoppage place" will be erected at the northern seaport next spring. The northern port, which may be a hotel, announced he received a permit from the Manitoba government for the Churchill structure.

Described as one of the most valuable historic relics discovered in Canada of a special chamber at the port of London for use in the torture of Canadian chilled and frozen meat products was announced by Hon. H. H. Stevens, minister of trade and commerce.

British Columbia's agricultural products, despite disastrous low prices, were worth \$34,460,000 in 1933, a slight gain over the 1932 figure of \$31,973,923, according to a year-end estimate, released by Hon. K. C. MacDonald, minister of agriculture.

Lewis Lukes, pioneer Canadian "airroad" builder, is dead at Toronto at the age of 80 years. He was associated with Mr. Mann and Mann in construction of the Canadian Pacific railway through the Rockies and in completing the Canadian Northern railway.

The success of the League of Nations depended on the development in each country of strong movements that would support the ideal of world peace, said Ernest Lapointe, president of the League of Nations Society in Canada, said in an address at Ottawa.

## Hard On Roadbed

### Speed Trains Are Not Put Into Regular Service

A train which travels so quickly that its high speed is still in advance of practical use is an anomaly, but Germany possesses it today in the electric "Fleischwagen" train. It is of interest to note that thirty years ago speeds unequalled in the world were achieved by electrical trains built by English electric companies. On September 15, 1903, the British Midland and Lancashire and Yorkshire Railways reached, and has since increased on their route to 120 miles per hour. The "Zeppelin on rails" two years ago, still stands unchallenged as the world's record for travel on rails but the speed is too high for practical use.

## Starts Fiftieth Reading

Mrs. Bell Gilham, 88, of Fort Scott, Kas., has begun her 50th reading of the Bible and she plans to make it a lifetime's work.

The low cost book is simply shaped so you can make it in an unbelievably short time.

Just two major parts to the pattern—attach shoulder straps and it's finished.

Style No. 426 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28 and 40 inches.

You can make it at an amazingly small cost. The standard counters are set up with expedition, utility sticks and satin crepe suitable to fashion it.

Buy them at a big reduction in cost.

Size 16 requires 2½ yards 35 or 36 inches wide and 2½ yards binding.

Price of pattern 20 cents in stamp or coin coin is preferred. Wrap coin carefully.

## Alberta Phone System

### Government Would Sell Lines To Farmers' Organizations

Running behind at the rate of a million dollars a year on its telephone system, the Alberta government is considering the sale of its lines to farmers' organizations in an effort to sell its rural lines. One sale has been completed, a group of farmers west of Bentley taking over the lines and telephones in that area.

The telephone lines have purchased at sacrifice prices. Poles in the grounds, including anchors, cross-arms, side block, insulator and other accessories are offered at 30 cents apiece. Iron wire will be sold at a cent a pound, or about \$3.40 for a mile of line (two wires).

## Could Prevent War

### Bi-millennium States Britain And United States Have Power

John G. Diefenbaker, chairman and editor of the London Express, with some force that talk of war in Europe is "bunk" and that Britain and United States, "standing shoulder to shoulder," could prevent any war from starting.

If the British Empire and the United States who held the bag and paid the bills in the late lamented war were to refuse to come into another one, physically or financially, no nation in Europe would fight—Vancouver Sun.

One is old only when he begins to accept things as they are without trying to better them.

## Moisture Conservation

### Hon. James C. Bryant, K.C., chairman of the Saskatchewan Commission on Conservation and Afforestation, has announced particulars of a state watch he felt—

- (1) would result in the desired curtailing of wheat acreage;
- (2) would help to keep the crop and prevent the drying out of the land by hot winds;
- (3) would help to keep the roads open in winter;
- (4) would furnish a wool supply for the farm families;
- (5) would provide a shelter for birds which would assist in keeping down insects;
- (6) would add to the beauty and attractiveness of the landscape;
- (7) would help very materially to bring back normal rainfall to the drought stricken areas of the section.

This could be accomplished by the planting of trees in strips ten rods wide and 120 rods long, running North and South, through every farm section of land in the prairie districts of the province.

If all the trees now growing on the Forestry Farms at Indian Head and Sutherland, and on the Prairies, 15,000 acres of land, were planted in strips 120 rods long and 10 rods wide, the total area would be 1,500,000 square rods, or 225,000 acres.

The contract could provide that in the event the farmer tenant failed to plant the trees, the county council could have the work done at his expense.

Where the farmers' boundaries end in the centre of a section, each farmer would be given a strip of timber on his own land.

The proposed plan will utilize ten acres of land for each acre of wheat to be grown, thus giving a yield of 10 bushels per acre taken from cultivation in order to comply with the terms of the Wheat agreement could not be expected to affect the market price of wheat.

The snow will drift into the timber and thus to the centre of the wheat field, away from the roads, so that they could be kept open during the winter at minimum cost.

The trees will grow in the spring after the frost gets out of the surface of the ground, and will sink down into the ground and help to hold the reserve of moisture in the subsoil.

This plan has recently been suggested by an expert in the United States, and it is in evidence, while it is essential that the lessons of the dry years be not forgotten, and provided basic during the wet years.

The prospects are that there will be plenty of moisture in the next few years so that the trees will grow fast, and it is essential that the lessons of the dry years be not forgotten, and provided basic during the wet years.

It is designed along very simple lines making the figure beautiful through the bust and the hips.

## International Trade

### Nations Have Always Exchanged Goods That Were Scarce

We are waiting for Siam to become self-sufficient in optical instruments and Thailand in salt port, it turns out that France, the land of flowers and wine, needs it necessary to import her apples and pears from the United States. So far, however, the ancient Egyptians are said to be superior to that of the ancient Mayas. Engineers of the Mayan civilization, the storage and irrigation system in the Yucatan area, is to be restored and put back into service by the Mexican Government. The Mayan network of canals and reservoirs is said to be superior to that of the ancient Egyptians. Reservoirs of the system were lined by the Mayan engineers with waterproof stones and plaster, as were the aqueducts, branch canals and drainage ditches. The water was stored during the rainy season for use during the rest of the year.

Tree studies in Colorado's Rocky Mountain region indicate that there has been little change in climate for the past 400 years.

Mexico's population is 16,552,222, the Department of Commerce announces.

These are immediately to follow combat any real emergency of conflict, with all available scientific knowledge.

The Government could make a contract with each farmer in the dotted out area, to summerfall a strip 10 rods wide, one year, through the cultivation of the trees for ten years after, to keep the stock and the same trees. In consideration of this agreement, the Government could furnish the farmer with seed, tools, fertilizer, etc. The strip could consist of half quartered trees, half half ash and thus the tree stand alone.

The contract could provide that in the event the farmer tenant failed to plant the trees, the county council could have the work done at his expense.

Where the farmers' boundaries end in the centre of a section, each farmer would be given a strip of timber on his own land.

The snow will drift into the timber and thus to the centre of the wheat field, away from the roads, so that they could be kept open during the winter at minimum cost.

## SUNDAY SCHOOL LESSON

FEBRUARY 4

### PUTTING GOD'S KINGDOM FIRST

Golden Text: "Seek ye first His Kingdom and His Righteousness; and all these things shall be added unto you." Matthew 6:33.

Lesson: Matthew 6:1-34.

Devotional Reading: Psalm 19:7-14.

Explanations and Comments

True Treasures, verses 19-21. When Jesus bids one lay up for himself treasures of gold and silver, etc., he is not speaking against wise provision for the future but on earth, but in the spiritual sense of earthly and heavenly things. Rather than aversive wealth to store up, he counsels one to lay up for himself treasures in heaven, which are instructive. Whittier puts this thought into verse:

"Before the end comes, where the chariot is, we are slow Disease, lay up your well-doing, wealth, things."

Not all the things we have

can take away.

When call'd thine thine—goods, pities,

morning at 12 o'clock.  
REV. J. R. DAVIDS**In Winter as in Summer**For more than a quarter of a century United Grain Growers has  
been serving the farmers of western Canada. From your own ex-  
perience and that of your neighbors you know it is to be depended  
on when you market your grain.If you wish to buy Government tested registered or  
certified seed U.G.G. agents or offices will put you in  
touch with reliable sources.**DELIVER YOUR GRAIN TO****UNITED GRAIN GROWERS LTD.**
